===ARTIST INFO===

The Jared C. Balogh audio project is my name and was formed back in July of 2010. This project is consider more organic writing compared to my other audio project Trans Atlantic Rage which is heavy editing, processing, effects driven music. "Balogh" focuses on more composing in notation, intuitive, first take, accidental and improv forms of writing and creating. This project has no limits in what genres it creates in and is predicated on experimental and avant-garde idea. To date, "Balogh" has been mainly based in jazz but also mixes styles of classical, drone, field recording, noise, nonsensical, shoe-gaze, electronic, etc.... Also has taken part in collaborations and splits with artists from around the world.
